

The 1:1 Mentor Program - We need you!

Help strengthen the pipeline of females pursuing STEM-related fields

The 1:1 Mentor program

By acting as a role model, mentors provide inspiration, encouragement, and leadership to the girls as they learn more about possibilities in STEM.

The mentorship relationship between the Junior and Senior Mentor take place over the duration of the cohort (first week of January) and is comprised of five posts back and forth between Senior and Junior mentors using the Flip (previously Flipgrid) environment. Some corporations (like Dell) may block the Flip site while you are using your corporate credentials, so please use your personal credentials (Gmail, for example) to log in to Flip.

Please note that this is not a technical mentorship opportunity.

Junior and Senior Mentor conversations

1. Introductions
2. 1st hour/activity of leadership
shared for guidance or feedback
3. 2nd hour/activity of leadership
shared for guidance or feedback
4. 3rd hour/activity of leadership
shared for guidance or feedback
5. Summary of leadership learning

- Marketers (write the tweets)
- Reporters (record club progress)
- Tech Support (devices, Minecraft, Flip, etc.)
- Minecraft tutorial creators or resource curators
- Greeters on Flip
- Panel speakers
- Celebration hosts

The Girls Who Game Mentor's role

- Be a positive role model; help build self-esteem and motivation
- Build relationships by planning and participating • Strive for mutual respect
- Set goals and work toward accomplishing them • Share your experience!

The Junior Mentor has volunteered to be part of this program and commits to three hours of leadership or mentorship activities. She has identified her leadership project(s) and will be ready to consult with you during these sessions.

Typical leadership projects could include:

- Planners and organizers
- Design thinking leaders
- Minecraft teachers
- Photographers
